Career Objective

As a second-year Computer Science student at the University of Canterbury with a consistent record of academic excellence, I am eager to secure an internship position for this summer to apply and expand upon acquired skills in a real-world setting. Gain the first opportunity in the tech industry, excitement to learn hands-on experience creating innovative solutions.

Skills Summary

Problem-solving

- Working as a chef honed excellent autonomy and initiative in problem-solving, finding innovative solutions when facing challenges. Achievement in optimizing food cooking processes and designing efficient systems are essential for enhancing productivity and quality.

Teamwork and Leadership

- Demonstrated leadership as a team leader with a multicultural team in previous role, confronted challenge, motivating team members, and ensuring high-quality service delivery.
- Took on leadership roles in academic projects through study, guiding peers and facilitating collaboration to achieve objectives.
- At each workplace in NZ and overseas, made a positive contribution to the work environment by being reliable, flexible, supportive and friendly towards work colleagues.

Learning

- Achieving a grade A during the first year of study while balancing full-time work and personal life exemplifies dedication and strong time management skills as an adult student.
 - As a results-driven developer, enrolment in Microsoft Project signifies a commitment to further learning and skill application in pursuit of professional growth.
-
